**DETAILED ACTION**

**DETAILED ACTION**

1. This communication is in response to amendment filed 5/11/05.

***Response to Amendment***

2. Claims 109-113, 115-119, 126 and 127 have been amended per request. Claims 109-120, 126 and 127 are pending.

***Response to Arguments***

3. Applicant's arguments with respect to claims 109-120, 126 and 127 have been considered but are moot in view of the new ground(s) of rejections. Note that the amendment has resulting in deletion of claim limitation(s), which would have otherwise rendered the claims in technological art. Example, independent claim 109 as amended is rendered outside the technological art.

Amendment of independent claims 126 and 127 recite technology only in the preamble.

(See detailed explanation below.)

***Claim Rejections - 35 USC § 101***

4. Claims 109-114, 126 and 127 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

5. **Claimed invention not within the technological arts.**

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts. The phrase "technological arts" has been created and used by the courts to offer another view of the term "useful arts". See *In re Musgrave*, 167 USPQ (BNA) 280 (CCPA 1970). Moreover, the courts have found that a claimed computer implemented process was within the "technological art" because the claimed invention was an operation being performed by a computer within a computer. See *In re Toma*, 197 USPQ (BNA) 852 (CCPA 1978). Finally, the Board of Patent Appeals and Interferences (BPAI) has recently affirmed a §101 rejection finding the claimed invention to be non-statutory based on a lack of technology. See *Ex parte Bowman*, 61 USPQ2d (BNA) 1669 (BdPatApp&Int 2001).

In the present case, claims 109-114 do not recite the method steps as being carried out with any technological means such as a computer or a digital communication network. Therefore, the subject claims are found to be non-statutory subject matter. In order to correct this defect, one or more process steps must be recited as being carried out using technological means in a non-trivial manner, i.e. at least one critical (i.e. non-trivial) feature of the invention must be recited as being performed using at least one technological means.

As to technological arts recited in the preamble, (see claims 126 and 127) mere recitation in the preamble (i.e., intended or field of use) or mere implication of employing a machine or article of manufacture to perform some or all of the recited steps does not confer statutory subject matter to an otherwise abstract idea unless there is positive recitation in the claim as a whole to breathe life and meaning into the preamble.

In the present case, the claims recite technology only in the preamble (“computerized method”) without any process steps being carried out with a computer.

***Allowable Subject Matter***

6. Claims 115-120 are allowed subject to the following amendment to the preamble.

A computer-readable medium storing computer executable instructions for maintaining..., wherein the computer executable instructions when executed by a computer perform the process steps comprising: ...

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
